Coffee vs. Postum

Any analytical chemist can prove by analysis, that coffee contains two harmful drugs-

Caffeine-an alkaloid that irritates the heart, liver and kidneys, and upsets the nerves.

Tannin-a drug which produces an astringent action upon the tissues of the stomach and bowels, But the greatest test of all is made in thousands

of homes where it is daily proven by personal experience that headaches, biliousness, indigestion heart irritation and nervousness are very often caused by coffee drinking.

An ordinary cut of coffee contains about 21/2 grains of caffeine, and 22-5 grains of tannin.

Some coffee concerns have tried in various ways-without much success-to rid coffee of its caffeine, because they know its harmful effects. Now they are agitated because people are objecting to the presence of tannin in coffee-the same element (but obtained from bark) that is used to tan leather.

The simple, easy way out of coffee troubles is to quit this harmful beverage and use the pure food-drink

POSTUM

It is absolutely free from these drugs or any harmful substance. Made only from prime wheat (roasted) and a small percent of molasses. Postum contains the rich, nutritious values of the grain-is a genuine food-drink.

Postum comes in two forms:

Regular Postum-must be well boiled. 15c and 25c packages. Instant Postum-a soluble powder. A teaspoonful stirred in a cup of hot water, with cream and sugar, makes a delightful beverage instantly. 20c and 50c tins. The cost per cup of both kinds is about the same.

"There's a Reason" for POSTUM
